

Using Adobe Bridge to synchronize color settings for Photoshop and InDesign.

To set up personalized color settings that you can select in Adobe Bridge, open Color Settings in one of the Adobe Creative Suite applications, set and save your settings from that application, then open Color Settings in Bridge.

To synchronize color settings:

1. Open Adobe Bridge.
2. Choose Edit > Creative Suite Color Settings.
3. Select the appropriate color setting file. The Adobe default files and saved files are listed. If the file you want is not listed, then check to show the expanded list of color setting files.
4. Click Apply to assign the selected color settings to all your Adobe Creative Suite applications.
